

User Story 1:- Account access

As a user, I want to be able to access my specific settings and data by logging into my existing account with my username and password.

Acceptance criteria:

- Make a form with fields for user's username and password on the login page.
- have a username box that should accept the format and characters supplied during account creation.
- The password field should be sensitive and securely masked, to protect the input.
- If the entered details are invalid, student should get a clear error message.
- After successfully entered the account by entering the valid credentials it should go to the application's main page or a predefined landing page.
- The login session should be active until students explicitly log out or until a certain period of inactivity is reached.
- provide a redirect login page to log in again if student performs an action that requires authentication while not logged in.

User Story 2:- Account Password Reset

As a user, I want to be able to reset my password if I forget it, so that I can regain access to my account.

Acceptance criteria:

- On the password reset page, make a form with a field for entering person's account's email address.
- The email address box must support acceptable email formats and be associated with the user's account.
- If a person inputs an email address that is not already associated with an account, show a message indicating that the email address is not registered.
- Send an email with a password reset link after entering a valid email address and submitting the form.
- To maintain security, the password reset link should be unique and expire after a defined amount of time.
- Validate the new password field to ensure that it fulfills the required criteria.

- If the new password does not fulfill the validation criteria, send a particular error message.

User Story 3:- User Profile update.

As a student, I want to be able to update my account information, so that my information is accurate and up to date.

Acceptance criteria:

- On to the account settings page, there should be a form or interface where a person can edit the account details.
- The current account information, such as my username, email address, and profile image, should be displayed on the account settings page.
- The user should be able to alter and update an email address, and after doing so a confirmation message should be displayed.
- The email address box should validate the input to ensure that it is in the correct email format and is not already associated with another user account.
- If A user inputs an email address that is already associated with another user account, they should receive a clear error message indicating that the email address is already associated with another user account.

User Story 4: Employer - Candidate Management

As an employer, I want to be able to efficiently manage incoming job applications, review candidate profiles and resumes, and track their progress in the hiring process.

Acceptance Criteria:

- Provide a centralized database for employers to view and manage candidate applications, including their resumes and application details.
- Enable employers to review candidate profiles, including their skills, education, work experience, and any additional information provided.
- Allow employers to track the progress of each candidate throughout the hiring process, such as the application status, interview schedules, and evaluation results.

- Provide communication tools or integrations to facilitate direct communication between employers and candidates, such as messaging or email features.

User Story 5: Resume Builder and Profile Creation

As a student, I want to be able to create my resume and upload my work easily so that employers can see my profile.

Acceptance Criteria:

- Students can create their professional resumes using customizable templates, content suggestions, and formatting guidance.
- They can showcase their skills, experience, education, and achievements.
- They can upload portfolio samples, certifications, and attach links to social media or personal websites.
- Employers can create company profile showcasing company values, job postings, company achievements, posts regarding new product launches, etc.

User Story 6: Networking and Collaboration

As a student, I want to be able to connect with mentors, industry leaders, etc. so that I can learn and understand more about the corporate world.

Acceptance Criteria:

- Students can connect with industry professionals, mentors, and like-minded individuals through networking features.
- Explore user directories, engage in chat/messaging, and participate in industry-specific forums/groups.
- Collaborate on projects, share documents, and receive valuable feedback through collaboration tools.
